4	RPA for Juniors	Robotic process automation (RPA) is a software technology that makes it easy to build, deploy, and manage software robots that emulate humans actions interacting with digital systems and software. Just like people, software robots can do things like understand what's on a screen, complete the right keystrokes, navigate systems, identify and extract data, and perform a wide range of defined actions. But software robots can do it faster and more consistently than people, without the need to get up and stretch or take a coffee break.	2022- 03-26 13:34:36	2022- 03-26 17:26:45	500	500	03/09/2022	05/28/2022	⊠
5	Coding For Youngs	Our mission is to provide effective and simplified education to empower our students to be the creators of tomorrow.	2022- 03-26 13:39:27	2022- 03-26 17:26:41	50	450	04/17/2022	06/25/2022	E
6	Al For Joniors	Robotic process automation (RPA) is a software technology that makes it easy to build, deploy, and manage software robots that emulate humans actions interacting with digital systems and software. Just like people, software robots can do things like understand what's on a screen, complete the right keystrokes, navigate systems, identify and extract data, and perform a wide range of defined actions. But software robots can do it faster and more consistently than people, without the need to get up and stretch or take a coffee break.	2022- 03-26 13:41:26	2022- 03-26 17:27:01	200	500	04/27/2022	07/22/2022	⊠
7	Advance Rba	Robotic process automation (RPA) is a software technology that makes it easy to build, deploy, and manage software robots that emulate humans actions interacting with digital systems and software. Just like people, software robots can do things like understand what's on a screen, complete the right keystrokes, navigate systems, identify and extract data, and perform a wide range of defined actions.
